SKILLS

Languages
PHP, JavaScript, SQL, HTML, CSS

Backend
Laravel, CodeIgniter 3/4, WordPress (custom themes and plugins)

Frontend
React.js, Angular, Vue.js, Bootstrap

Databases & Caching
MySQL, PostgreSQL, MongoDB, Redis

Architecture & Design
Multi-tenant SaaS, RBAC, REST API design

Integrations & APIs
Google Calendar and Workspace APIs, Microsoft Calendar and Workspace APIs, Stripe (incl. Apple Pay), PayPal, Twilio SMS, Mailchimp, Firebase Cloud Messaging, WooCommerce API, JWT authentication

DevOps & Cloud
Linux Servers, Google Cloud

Testing & QA
PHPUnit, Postman API testing

Developer Tools
Git, GitHub, Composer, npm, Vite, Windows

Toufiq Rehman Sayyed

FULL STACK DEVELOPER

Full Stack Developer with 5+ years of expertise building and optimizing robust web applications and multi-tenant SaaS platforms using Laravel, CodeIgniter, and modern PHP stacks. Proven ability to accelerate API response times by ~60% through query restructuring and Redis caching while ensuring secure, scalable database architectures and seamless front-end integrations. Adept at owning end-to-end software lifecycles from SRS translation and schema design to queue-based background processing and deployment.

WORK EXPERIENCE

Full Stack Developer
May 2026 – Present
Deep Technologies Pvt Ltd
Surat, India

- Architected multi-tenant SaaS products end-to-end with React on the frontend and Laravel on the backend, owning schema design, API development, and UI implementation.
- Optimized multi-tenant workloads at scale by implementing queue-based background processing and caching strategies.
- Engineered OrdGrow, a dynamic, form-driven order management platform with configurable, business-specific workflows and an admin-driven form builder.
- Designed MySQL/PostgreSQL schemas with attention to normalization, indexing, and query optimization for new modules.

Backend Developer
Nov 2023 – Jan 2026
Sourcecube Technologies Pvt Ltd
Remote

- Reduced average API response time by ~60% through database index tuning, query restructuring, and Redis caching across a multi-tenant Laravel platform.
- Designed and built 40+ RESTful API endpoints on a multi-tenant Laravel platform, consumed by Angular, iOS, and Android clients.
- Built Laravel queue- and event-driven pipelines for asynchronous background processing under peak load, plus webhook consumers for third-party platform events.
- Tuned MySQL schemas (views, transactions, indexing) for reporting workloads and added multi-language support across the platform.
- Integrated Google Calendar and Microsoft Calendar APIs with automated reminders and smart task routing.

Web Developer
Jan 2021 – Oct 2023
Potenza Global Solutions Pvt Ltd
Surat, India

- Built and maintained full-stack features on PHP (Laravel & CodeIgniter 3/4) backends with responsive frontends, including a Laravel service with JWT authentication, file management, and scheduled commands.
- Designed REST APIs for mobile-backend data exchange following RESTful security best practices; implemented RBAC via CodeIgniter controller filters.
- Refactored legacy codebases to reduce technical debt across production systems.
- Developed custom WordPress themes and plugins (Hooks, Custom Post Types, ACF, WooCommerce API, Elementor) for client marketing and e-commerce sites.
- Integrated Stripe (with Apple Pay) and PayPal payment gateways, Twilio SMS, Mailchimp, and push notification services across multiple client products.

SELECTED PROJECTS

01 OrdGrow

Multi-tenant SaaS order management platform for downloadable files, with an admin-driven form builder.

- Multi-tenant, multi-module platform for configurable service bookings.
- Dynamic form builder that generates order fields from admin-created service forms and customizable business workflows.
- Queue-based background processing, caching strategies and normalized MySQL/PostgreSQL schemas.

Tech Laravel · React · MySQL · PostgreSQL · Redis

02 Workplace & Service Management System (Gfacility)

Multi-tenant SaaS for booking services, products and rooms, with integrated helpdesk ticketing.

- Multi-module platform for service bookings, room scheduling, and helpdesk ticketing.
- Multi-tenant backend with RBAC, queue-based async workflows, and Google/Microsoft Workspace integration.

Tech Laravel · Angular · MySQL · Redis · RBAC · Queues

03 Skooly

School and university ERP managing student, teacher and staff lifecycles, attendance, courses, and accounting/expenses.

- QR-code-based contactless attendance system.
- Automated workflows across admissions, fee collection, timetable scheduling and grade transcripts.

Tech PHP · CodeIgniter · MySQL · Bootstrap

EDUCATION

Jun 2019 – May 2021 · Surat, India

Master of Computer Applications (MCA)

Computer Science

Bhagwan Mahavir College of Management

Jun 2015 – Feb 2018 · Surat, India

Bachelor of Computer Applications (BCA)

Computer Science

C B Patel Computer College
