Jun 2015 – Feb 2018 • CGPA 7.17

PROFILE

Full Stack Developer with 5+ years building RESTful APIs and multi-tenant SaaS platforms on React, Node.js, and Laravel. Proven record of cutting API response times, hardening access control, and shipping integrations that hold up under real production load — from schema to shipped UI.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Deep Technologies Pvt Ltd

Surat, India | May 2026 – Present

- Build multi-tenant SaaS products end-to-end with React on the frontend and Laravel on the backend.
- Deliver OrdGrow, a dynamic, form-driven order management platform with configurable workflows.
- Implement queue-based processing and caching strategies to keep multi-tenant workloads performant.

Backend Developer — Sourcecube Technologies Pvt Ltd

Surat, India | Nov 2023 – Jan 2026

- Designed 30+ RESTful API endpoints on a multi-tenant Laravel platform for Angular, iOS & Android clients.
- Cut average API response time by ~60% through index tuning, query restructuring, and caching.
- Integrated Google & Microsoft Calendar APIs with automated reminders and smart task routing.
- Built Laravel queue/event pipelines for async processing and webhook consumers under peak load.

Web Developer — Potenza Global Solutions Pvt Ltd

Surat, India | Jan 2021 – Oct 2023

- Built full-stack features on Laravel & CodeIgniter with JWT authentication and scheduled commands.
- Integrated Stripe, PayPal, Twilio SMS, and Mailchimp across multiple client products.
- Developed custom WordPress themes/plugins and refactored legacy code to cut technical debt.

SELECTED PROJECTS

- **OrdGrow:** Multi-tenant order management SaaS with an admin-driven dynamic form builder.
- **Gfacility:** Multi-tenant workplace platform for bookings, room scheduling & helpdesk ticketing.
- **I PROMISE:** Versioned REST API (iOS/Android) with JWT auth and FCM push notifications.
- **Skooly:** School/University ERP with QR-code-based contactless attendance tracking.
